

POLYMER WEEK 2025

THE NATURE OF CLAY

SARAH SHRIVER'S CLASS

With Sarah, you will learn to make vibrant, hollow “fruit” objects in unique shapes and color combinations. Using sheets of translucent clay combined with additional mediums, each piece will take on its own exciting personality.

You will be working with Cernit polymer clay, which will be provided to all students. Only a few additional tools need to be brought with you to create your piece. All other essentials, including a working tile and wet wipes, will be ready for you on-site.

Note: Items marked with a * will be available for purchase at the venue, to make your trip to the Czech Republic easier—no need to travel with sharp tools or search for specific mediums.
